# Planetarium Stuttgart

Willy-Brandt-Straße 25  
70173 Stuttgart  
Phone: 0711 21689015 (Mo-Fr 8:00 - 12:00 + 14:00 - 16:00)

info@planetarium-stuttgart.de  
www.planetarium-stuttgart.de

Director: Dr. Uwe Lemmer

## Entrance fees

Adults		
morning	10:00 - 12:00	5 EUR
afternoon + evening	12:00 - 21:00	9 EUR
(School)Kids, Students, Handicapped people		5 EUR

Accompanying persons of  
people from 80% handicap

free

Tuesday	9 EUR
Music- and Lasershows (no discounts)	9 EUR

- You can pay with „Family Card /Familienkarte“
- The whole building is barrier-free, no steps or ramps
- There are wheelchair places available in the stardome

## Opening hours

Our ticket counter opens 1 hour before the show starts.

**Most of our shows in the stardome are simulcast  
in English (Except special events).**

In order to enjoy the English version you need to pick up

### Our Audioguide System:

At our ticket counter we will provide you with a  
ready-to-go system consisting of a receiver-box using  
premium Sennheiser headphones. All we ask for is a  
deposit of 20 EUR, which will be refunded once the  
devices are returned to the operator in the dome.

ASTRONOMY FOR EVERYONE

## SUMMER STARS ABOVE STUTTGART (SUMMER STARS ABOVE STUTTGART)

SUITABLE FOR AGES 8 AND UP

With its warm nights, summer offers a good Opportunity to “walk in the heavens”. In this Demonstration we use the star projector and you receive Tips for orientation in the summer starry sky.

Travel with us along the typical constellations for this time of year. We'll take a look at the North Star, Hercules, across the Summer Triangle to winged horse Pegasus. Leaving the bright environment of the big city, we can spot the shimmering band of light from the Milky Way.

We also use the possibilities of the planetarium and carry out a virtual journey to the southern hemisphere of the earth. Our destination is New Zealand and many unfamiliar constellations.

Duration: about 1 hour

Please find the showtimes in the calendar starting on page 15.

ASTRONOMY FOR EVERYONE

## SPRING STARS ABOVE STUTTGART (FRÜHLINGSSTERNE ÜBER STUTTGART)

SUITABLE FOR AGES 8 AND UP

In Spring the nights grow shorter, but the mild climate invites us to peak upwards to the stars.

Experience what can be seen in the spring above Stuttgart and how to orient yourself in the tangles of the night sky.

The most important constellations and celestial objects are explained. This presentation is an ideal companion to a visit to an observatory.

Our analog starprojector gets a real workout showing stars and planets. We also travel to shores far away and visit the southern hemisphere to take a look at the sky there.

Duration: about 1 hour

Please find the showtimes in the calendar starting on page 18.

ASTRONOMY FOR EVERYONE

EXPLORE! INTO SPACE WITH KEPLER  
*(EXPLORE! MIT KEPLER INS ALL)*

SUITABLE FOR AGES 10 AND UP

Looking at the history of astronomy from the beginnings in ancient Babylon to the current space age, a few trailblazing people stand out in particular.

One of these great minds was Johannes Kepler, who was born near Stuttgart.

This planetarium presentation shows in a visually stunning and impressive way how Kepler's findings are used in modern space flight for the flight through the solar system.

To achieve this, we will embark a virtual spaceship that takes us to a planet whose orbit was of special research interest to Kepler.

In this version (extended by the planetarium Stuttgart) of the internationally acclaimed and award-winning fulldome presentation "Explore!", you will also experience a realistic starry sky and learn a lot about the universal genius from Weil der Stadt.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

(MORE THAN)

100 YEARS OF ETERNITY  
*(100 JAHRE EWIGKEIT)*

SUITABLE FOR AGES 12 AND UP

The invention of the first planetarium projector is celebrating its centenary. On behalf of the German Museum in Munich, the Carl Zeiss company in Jena developed the first sky projection simulator. They were turned on for the first time on October 21, 1923. The first public performances took place on May 7, 1925 in the German Museum.

Today there are thousands of planetaria in the world and between 2023 and 2025 they celebrate the origin of the underlying invention, which was considered awe-inspiring at the time and was called the "Miracle of Jena".

After a detailed look at the artificial starry sky we look at the history of the creation of the planetarium.

In the production "100 Years of Eternity" the audience goes on a cultural-historical journey along high-resolution 360° images and dome-filling animations, retracing the individual paths which take place in Jena a hundred years ago.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

THE ADVENTURE OF HUMAN SPACEFLIGHT  
 DESTINATION MARS  
*(AUFBRUCH ZUM MARS)*

SUITABLE FOR AGES 8 AND UP

People walking on Mars is a long lasting dream in astronautics. Today this dream shifts ever closer to reality.

Space engineering has sped up significantly and the flight of an astronaut crew to the red planet is getting closer and closer.

Both NASA and the private company SpaceX are developing their own rockets that will transport people and material to Mars in the foreseeable future.

Not all problems are solved. But half a century after the moon landings we have developed skills, knowledge and the essential technologies to prepare astronauts for the next step into space.

This full-dome show skips some 15 years into the future and helps us to encounter the surface of the red planet. Former NASA-astronaut Mae Jemison tells us how to survive on the barren surface of Mars.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

OUR PLANETARY NEIGHBORHOOD  
 PLANETS - JOURNEY INTO THE SOLAR SYSTEM  
*(PLANETEN - EXPEDITION INS SONNENSYSTEM)*

SUITABLE FOR AGES 8 AND UP

In this presentation we will use the magic of the planetarium to visit the planets of our solar system. Our first stop is Mars, where we go in search of signs of life.

After that we will visit the explosive landscape of a shattering comet and then peek at the kingdom of the giant planets Jupiter and Saturn. Cloud swirls, volcanic moons and ring systems will unfold before our very eyes.

After a detour to the distant dwarf planet Pluto we will reach beyond our solar system and check out a speculative look at the surface of an exoplanet in the depths of space.

Join us on a spectacular tour of the natural wonders in the kingdom of the sun!

Duration: about 55 minutes

Please find the showtimes in the calendar starting on page 19.

WITHOUT BEING COLD IN THE SNOW  
AURORA - LIGHTS OF WONDER  
*(AURORAS - LICHTER DES NORDENS)*

SUITABLE FOR AGES 8 AND UP

Our journey into the world of the Northern Lights begins in Stuttgart. We get to know the stars and constellations of a winter evening sky and afterward we take virtual trip to the North Pole and experience the differences between the two vistas.

A trip to the International Space Station shows us how astronauts perceive auroas from above on the night side of our Earth. The interplay between solar wind, earth's magnetic field and atmosphere is explained.

Finally we reach northern Canada, where photographer O Chul Kwon recorded the magical phenomenon of the northern lights (Aurora borealis) with his cutting-edge video technology.

A grandiose dance of shapes and colors awaits us in the sky.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

A UNIQUE JOURNEY THROUGH TIME  
TIME TRAVEL - BIG BANG TO HUMANKIND  
*(ZEITREISE - VOM URKNALL ZUM MENSCHEN)*

SUITABLE FOR AGES 10 AND UP

The planetarium welcomes you to a voyage through space and time.

How did the universe come about? What happened on earth?

On this journey through time, you will witness the birth of the first stars.

The development of the universe is presented in impressive images and utilising state-of-the-art computer animations.

Massive stellar explosions and catastrophic comet impacts on Earth are a part of history, as are dinosaurs and other prehistoric creatures.

Join us on a unique journey through time!

Duration: about 55 minutes

Please find the showtimes in the calendar starting on page 19.

## OUR STARRY FUSION REACTOR

SOLAR SUPERSTORMS - EARTH IN DANGER?  
*(SONNENSTÜRME - GEFAHR FÜR DIE ERDE?)*

SUITABLE FOR AGES 10 AND UP

The Sun is the star of our lives.  
Without it there would be no life on Earth.  
But our tireless source of energy is not without danger -  
it has a real temper!

Enormous forces are at work on the solar surface:  
We can see eruptions of immense intensity, giant arches of super-  
heated gas and fiery waves which crash and collide high above  
the churning surface.

Earth is frequently hit by the might of solar storms.  
This has consequences ranging from beautiful lightshows like the  
polar lights to the collapse of powergrids.

This presentation shows the current state of solar science and the  
interactions between Sun and Earth.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

## A SPECTACULAR JOURNEY

COSMIC COLLISIONS  
*(KOSMISCHE KOLLISIONEN)*

SUITABLE FOR AGES 10 AND UP

Our starrystarry night sky seems calm,  
but what we see is deceptive.

Everything around us is subject to constant change  
by almost unimaginable forces. Enormous Collisions drive  
the evolution of the universe ahead.

Witness exploding stars, catastrophic impacts on Earth,  
as well as crashes of entire galaxies.

Join us on an amazing trip through time and space!

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

## OUR STARRY FUSION REACTOR

SOLAR SUPERSTORMS - EARTH IN DANGER?  
(SONNENSTÜRME - GEFAHR FÜR DIE ERDE?)

AB 12 JAHREN (GEEIGNET FÜR MITTEL- UND OBERSTUFE)

How do we know there was a Big Bang?  
And what kind of mysterious “dark energy” is responsible for the continued expansion of the cosmos ever since?

“Dark Universe” was produced at the American Museum of Natural History (New York) in collaboration with California Academy of Sciences (San Francisco) and Goto Inc. (Tokyo).

Of course our trusty star projector is also starring (pun intended) in this show.

We will take a look at the magnificent night sky at the beginning of the demonstration.

Duration: about 45 minutes

Please find the showtimes in the calendar starting on page 19.

## FOR KIDS

THE BASICS OF OUR STARS AND PLANETS  
(DAS KLEINE 1X1 DER STERNE UND PLANETEN)

SUITABLE FOR AGES 6 AND UP

Upon wishing on a shooting star, three children board the Space station OBSERVER and travel through space.

We will encounter a number of planets and get beamed down to the surfaces of Venus and Mars.

Saturn, with its rings of ice and rock, is also on the flight plan.

Afterward, like Icarus, they fly too close to the sun and are nearly devoured by hot tongues of flame.

After returning to earth, you can take a relaxed look at the magnificent night sky with the help of our star projector. Important stars and known constellations from all Seasons are presented and explained.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

FOR KIDS

## ACCIDENTAL ASTRONAUTS (PLÖTZLICH ASTRONAUT)

SUITABLE FOR AGES 4 AND UP

Welcome to the land of the robots!  
The clever robot children Annie and Cy visit a science center including a space museum with their school. But some things don't go as planned.

Together with their dog Armstrong they inadvertently hijack a spaceship, fly to the moon and learn a lot about the solar system and the constellations along the way.

See the extended version of the Stuttgart Planetarium, in which the star projector is also used for a glimpse at the starry sky with some of the most famous constellations like the Big Dipper and many more.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

FOR KIDS

## POLARIS AND THE SECRET OF THE NIGHT (POLARIS UND DAS GEHEIMNIS DER NACHT)

SUITABLE FOR AGES 4 AND UP

James is an inquisitive penguin from the South Pole, who travels the earth and meets polar bear Vladimir close to the icy North Pole. Together they look at the stars and wonder about the different polar nights at the South Pole and North Pole.

To solve this mystery, they hijack an abandoned submarine and turn it into a spaceship. Upon exploring Mars and Saturn they realize that other planets also have days, nights and seasons. When they return to earth, they finally find the answer as to why the nights are sometimes long and then so short again.

A loving and entertaining journey of discovery for young and old incorporating our optomechanical star projector!

Duration: about 45 minutes

Please find the showtimes in the calendar starting on page 19.

## MUSIC SHOW

## PINK FLOYD - DARK SIDE OF THE MOON

„Dark Side of the Moon“ is the most successful album by the British rock band Pink Floyd and a legendary milestone of the „Psychedelic and Space Rock“ of the 1970s.

Without it being the intention of bandleader Roger Waters, a number of tracks on the album seem downright made to be shown with our dome projection in the planetarium.

Immerse yourself in audiovisual spaces with the incomparable compositions of Pink Floyd and succumb to the pull into the depths of the cosmos and into the abyss of the human soul. Experience this intense musical journey of „Dark Side of the Moon“ with our powerful sound system in combination with 360° projection, star projector and laser show.

Duration: about 60 minutes

Please find the showtimes in the calendar starting on page 19.

## NOTICE

We utilize artificial fog and flashing lights in this show, not suitable for people with sensitivities to such effects.

## MUSIC SHOW

## QUEEN HEAVEN - THE ORIGINAL

The inimitable aura of the band, the creativity of their lyrics, the unique voice of Freddie Mercury and the tremendous power of their concerts - all this is reflected in this furious music show under the planetarium dome.

This is a tribute to the legendary rock band with a plethora of original music, photos and videos. Among the offerings are the greatest anthems in the band's history, such as „Bohemian Rhapsody“, „We Will Rock You“ and „Radio Gaga“.

Experience Queen with our powerful sound system in combination with 360° dome projection, our star projector and laser show.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 19.

## NOTICE

We utilize artificial fog and flashing lights in this show, not suitable for people with sensitivities to such effects.

Music

ELEKTRONIC MUSIC WITH LIVE VISUALS: HEAVENLY

# TUNESDAY

## LINEUP

- DI, 2.4. (TUNESDAY #84): TWO LIVES LEFT
- DI, 14.5. (TUNESDAY #85): RYAN NASTY (A.K.A. BOHO)
- DI, 4.6. (TUNESDAY #86): ZWIE:TECH

Electronic musicians from Stuttgart and elsewhere on the planet play their music in a live event at 8 p.m. each month among our stars. Become entranced by their unique creations while live visuals, laser, 360° fulldome video, stars from the Star projector and impressive light effects are surrounding you. Sit back and enjoy a unique, imaginative journey into the cosmos around us as well as within us - perfectly accompanied by live electronic music.

Tickets are available or on our website for 9 EUR.

Duration: 60-80 minutes (it's live...)
