Most of our shows in the stardome are simulcast in English (Except special events).

In order to enjoy the English version you need to pick up

Our Audioguide System:

At our ticket counter we will provide you with a ready-to-go system consisting of a receiver-box using premium Sennheiser headphones. All we ask for is a deposit of 20 EUR, which will be refunded once the devices are returned to the operator in the dome.

ASTRONOMY FOR EVERYONE SPRING STARS ABOVE STUTTGART (FRÜHLINGSSTERNE ÜBER STUTTGART)

SUITABLE FOR AGES 8 AND UP

In Spring the nights grow shorter, but the mild climate invites us to peak upwards to the stars.

Experience what can be seen in the spring above Stuttgart and how to orient yourself in the tangles of the night sky.

The most important constellations and celestial objects are explained. This presentation is an ideal companion to a visit to an observatory.

Our analog starprojector gets a real workout showing stars and planets. We also travel to shores far away and visit the southern hemisphere to take a look at the sky there.

ASTRONOMY FOR EVERYONE WINTER STARS ABOVE STUTTGART (WINTERSTERNE ÜBER STUTTGART)

SUITABLE FOR AGES 8 AND UP

The early sunset combined with clear views tempts a lot of people to look upon the starry winter sky.

Especially in the cold season there are numerous spectacular constellations easily recognizable.

And these constellations form the focus of this presentation. You will get an overview of the most important constellations and we will point out other special objects deserving a closer look.

We will show you how to find your way once your smartphone battery is empty, using just the help of the sky:

Not only in Stuttgart - also in the far south of the world.

As is well known, the inhabitants of the southern hemisphere experience opposite seasons. Does that also apply to the Starry sky? To answer this question, we will take a virtual trip to Australia using planetarium magic and take a look at the glorious southern sky.

Duration: about 1 hour

Please find the showtimes in the calendar starting on page 18.

Duration: about 1 hour

ASTRONOMY FOR EVERYONE

EXPLORE! INTO SPACE WITH KEPLER (EXPLORE! MIT KEPLER INS ALL)

SUITABLE FOR AGES 10 AND UP

Looking at the history of astronomy from the beginnings in ancient Babylon to the current space age, a few people stand out in particular.

One of these great minds was Johannes Kepler, who was born near Stuttgart.

This planetarium presentation shows in a visually stunning and impressive way how Kepler's findings are used in modern space flight for the flight through the solar system.

To achieve this, we will climb aboard a virtual spaceship that takes us to a planet whose orbit was of special research interest to Kepler.

In this version (extended by the planetarium Stuttgart) of the internationally acclaimed and award-winning fulldome presentation "Explore!", you will also experience a realistic starry sky and learn a lot about the universal genius from Weil der Stadt.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

MYSTERIOUS PAST THE STAR OF CHRISTMAS (DER WEIHNACHTSSTERN - EIN HIMMLISCHES ZEICHEN?)

SUITABLE FOR AGES 12 AND UP

Each year around christmas time we ask ourselves if there is a scientific explanation for the account of the famous Star of Rethlehem

For centuries, scholars have puzzled whether it was a real phenomenon visible in the sky or if it was just an imaginative embellishment of the Christmas story.

We will use our planetarium to take a closer look at the biblical story in the Gospel of Matthew.

We present a production made in the planetarium of Laupheim, and within it a journey into the time of Christ's birth when celestial research and astronomy were still closely connected.

Do the scientists have a plausible explanation for what is found in the ancient legends?

Nideo projector Duration: about 50 minutes

THE ADVENTURE OF HUMAN SPACEFLIGHT DESTINATION MARS (AUFBRUCH ZUM MARS)

SUITABLE FOR AGES 8 AND UP

For the longest time, humans setting foot on Mars was considered fiction, nowadays the realization that dream shifts ever closer to reality.

Space engineering and development has sped up significantly and the flight of an astronaut crew to the red planet is getting closer and closer.

Both NASA and the private company SpaceX are developing their own rockets that will transport people and material to Mars in the foreseeable future.

Not all problems are solved. But half a century after the moon landings we have developed skills, knowledge and the essentials technologies to prepare astronauts for the next step into space.

In this presentation, we will get to know the near-Earth desert planet and skip forward about 15 years into the future to take part in a landing on Mars.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

OUR PLANETARY NEIGHBORHOOD

PLANETS - JOURNEY INTO THE SOLAR SYSTEM (PLANETEN - EXPEDITION INS SONNENSYSTEM)

SUITABLE FOR AGES 8 AND UP

In this presentation we will use the magic of the planetarium to visit the planets of our solar system.

Our first stop is Mars, where we go in search of signs of life.

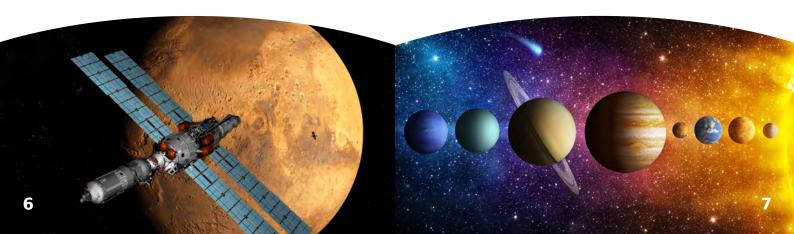

After that we will visit the explosive landscape of a shattering comet and then peek at the kingdom of the giant planets Jupiter and Saturn. Cloud swirls, volcanic moons and ring systems will unfold before our very eyes.

After a detour to the distant dwarf planet Pluto we will reach beyond our solar system and check out a speculative look at the surface of an exoplanet in the depths of space.

Join us on a spectacular tour of the natural wonders in the kingdom of the sun!

Duration: about 55 minutes

WITHOUT BEING COLD IN THE SNOW AURORA - LIGHTS OF WONDER (AURORAS - LICHTER DES NORDENS)

SUITABLE FOR AGES 8 AND UP

Our journey into the world of the Northern Lights begins in Stuttgart. We get to know the stars and constellations of a winter evening sky and afterward we will fly to the North Pole and experience the differences between the two vistas.

A trip to the International Space Station shows us how astronauts are viewing auroras from above on the night side of our Earth. The interplay between solar wind, earth's magnetic field and atmosphere is explained.

Finally we reach northern Canada, where the Korean photographer O Chul Kwon with his cutting edge video technology recorded the magical phenomenon of the northern lights (Aurora borealis). A grandiose dance of shapes and colors awaits us in the sky.

Duration: about 50 minutes
Please find the showtimes in the calendar starting on page 20.

A UNIQUE JOURNEY THROUGH TIME TIME TRAVEL - BIG BANG TO HUMANKIND (ZEITREISE - VOM URKNALL ZUM MENSCHEN)

SUITABLE FOR AGES 10 AND UP

The planetarium is your time machine.

How did the universe come about? What happened on earth?

On this journey through time, you will witness the Birth of the first stars.

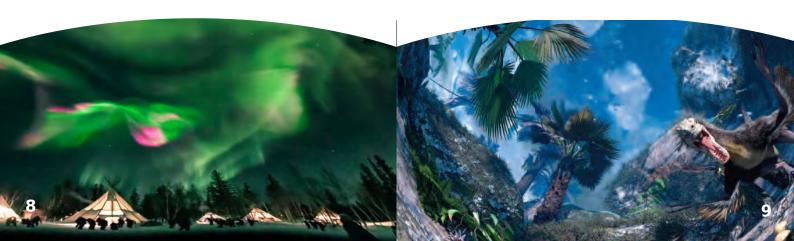

The development of the universe is presented in impressive images and untilising state-of-the-art computer animations.

Massive stellar explosions and catastrophic comet impacts on Earth are a part of history, as are dinosaurs and other prehistoric creatures.

Join us on a unique journey through time!

Duration: about 55 minutes
Please find the showtimes in the calendar starting on page 20.

OUR STARRY FUSION REACTOR SOLAR SUPERSTORMS - EARTH IN DANGER? (SONNENSTÜRME - GEFAHR FÜR DIE ERDE?)

SUITABLE FOR AGES 10 AND UP

The Sun is the star of our lives.
Without it there would be no life on Earth.
But our tireless source of energy is not without danger - it has a real temper!

Enormous forces are at work on the solar surface: We can see eruptions of immense intensity, giant arches of superheated gas and fiery waves which crash and collide high above the churning surface.

Earth is freuquently hit by the might of solar storms. This has consequences ranging from beautiful lightshows like the polar lights to the collapse of powergrids.

This presentation shows the current state of solar science and the interactions between Sun and Earth.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

A SPECTACLUAR JOURNEY COSMIC COLISSIONS (KOSMISCHE KOLLISIONEN)

SUITABLE FOR AGES 10 AND UP

Our starrystarry night sky seems calm, but what we see is deceptive.

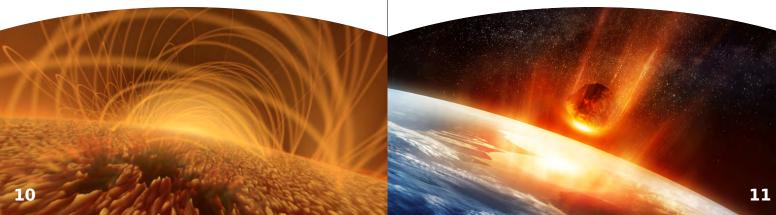

Everything around us is subject to constant change by almost unimaginable forces. Enormous Collisions drive the evolution of the universe ahead.

Witness exploding stars, catastrophic impacts impacts on earth, as well as crashes of entire galaxies.

Join us on an amazing trip through time and space!

Duration: about 50 minutes

FULLDOME SHOW CELEBRATING

100 YEARS ETERNITY (100 JAHRE EWIGKEIT)

SUITABLE FOR AGES 12 AND UP

The invention of the first planetarium projector is celebrating its centenary. On behalf of the German Museum in Munich, the Carl Zeiss company in Jena developed the first sky simulator. This projector was first tested on May 7, 1923 in Munich.

The first public performances took place on the 21st of October 1925 in the German Museum.

Today there are thousands of planetariums in the world and between 2023 and 2025 they celebrate the origin of the underlying invention, which at the time was called the "Miracle of Jena".

After a detailed look at the artificial sky we dive into the history of the creation of the planetarium. In this show "100 Years of Eternity" you will experience a cultural-historical journey including high-resolution 360° images and dome-filling animations.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

FOR KIDS

THE BASICS OF OUR STARS AND PLANETS (DAS KLEINE 1X1 DER STERNE UND PLANETEN)

SUITABLE FOR AGES 4 AND UP

Upon wishing on a shooting star, three children board the Space station OBSERVER and travel through space.

We will encounter a number of planets and get beamed down to the surfaces of Venus and Mars.

Saturn, with its rings of ice and rock, is also on the flight plan.

Afterward, like Icarus, they fly too close to the sun and are nearly devoured by hot tongues of flame.

After returning to earth, you can take a relaxed look at the magnificent night sky with the help of our star projector. Important stars and known constellations from all Seasons are presented and explained.

Duration: about 50 minutes

CHRISTMAS FOR THE WHOLE FAMILY

BETHLEHEM'S STAR (DER STERN VON BETHLEHEM)

SUITABLE FOR AGES 4 AND UP

Our children's presentation for christmas retells the story from the Gospel of Matthew. We will witness the events related to the birth of Jesus Christ on the dome of the planetarium.

Be surrounded by a 360-degree projection of an animated picture book.

We will accompany Maria and Joseph from the Annunciation of the angel in Nazareth to the search for a room in crowded Bethlehem. We will encounter the shepherds in the fields and together find the baby in the crib.

The star studded sky of more than 2000 years ago forms the heavenly backdropwithout any complicated celestial explanations disturbing the atmospheric presentation.

An event in cooperation with the planetariums in Freiburg and Lucerne.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

FOR KIDS

POLARIS AND THE SECRET OF THE NIGHT (POLARIS UND DAS GEHEIMNIS DER NACHT)

SUITABLE FOR AGES 5 AND UP

James is an inquisitive penguin from the South Pole, who travels the earth and meets polar bear Vladimir close to the icy North Pole. Together they look at the stars and wonder about the different polar nights at the South Pole and North Pole.

To solve this mystery, they hijack an abandoned submarine and turn it into a spaceship. Upon exploring Mars and Saturn they realize that other planets also have days, nights and seasons. When they return to earth, they finally find the answer as to why the nights are sometimes long and then so short again.

A loving and entertaining journey of discovery for young and old incorporating our optomechanical star projector!

FOR KIDS

ACCIDENTAL ASTRONAUTS (PLÖTZLICH ASTRONAUT)

SUITABLE FOR AGES 5 AND UP

Welcome to the land of the robots!

The clever robot children Annie and Cy visit a science cente including a space museum with their school. But some things don't go as planned.

Together with their dog Armstrong they inadvertendly hijack a spaceship, fly to the moon and learn a lot about the solar system and the constellations along the way.

See the extended version of the Stuttgart Planetarium, in which the star projector is also used.

Duration: about 50 minutes

Please find the showtimes in the calendar starting on page 20.

MUSIC SHOW

QUEEN HEAVEN -THE ORIGINAL

The inimitable aura of the band, the creativity of their lyrics, the unique voice of Freddie Mercury and the tremendous power of their concerts - all this is reflected in this furious music show under the planetarium dome.

This is a tribute to the legendary rock band with a plethora of original music, photos and videos. Among the offerings are the greatest anthems in the band's history, such as "Bohemian Rhapsody", "We Will Rock You" and "Radio Gaga".

Experience Queen with our powerful sound system in combination with 360° dome projection, our star projector and laser show.

Duration: about 50 minutes Please find the showtimes in the calendar starting on page 20.

MUSIC SHOW

PINK FLOYD -DARK SIDE OF THE MOON

"Dark Side of the Moon" is the most successful album by the British rock band Pink Floyd and a legendary milestone of the "Psychedelic and Space Rock" of the 1970s.

Without it being the intention of bandleader Roger Waters, a number of tracks on the album seem downright made to be shown with our dome projection in the planetarium.

Immerse yourself in audiovisual spaces with the incomparable compositions of Pink Floyd and succumb to the pull into the depths of the cosmos and into the abyss of the human soul. Experience this intense musical journey of "Dark Side of the Moon" with our powerful sound system in combination with 360° projection, star projector and laser show.

Duration: about 60 minutes Please find the showtimes in the calendar starting on page 20.

NOTICE

We utilize artifical fog and flashing lights in this show, not suitable for people with sensitivities to such effects.
